I. What is this product?

Type: The fund is a OGAW launched in Liechtenstein.

Term: The Fund does not have a pre-determined maturity, it is established for an indefinite period. For the recommended holding period, see section "V. How long should I hold it and can I take my money out early?". The Fund may be dissolved by resolution of LLB Fund Services AG. This is particularly the case if significant changes in the actual circumstances occur that justify dissolution. The Fund must be dissolved by operation of law if it falls below the minimum capitalisation required by law.

Objectives: The investment objective of the UCITS is primarily to achieve long-term capital appreciation by investing in convertible and high yield bonds worldwide. The investment strategy of the UCITS aims to achieve high absolute capital growth. It is an actively managed UCITS without reference to a benchmark. No assurance can be given that the investment objective will be achieved. The UCITS invests its assets in accordance with the principle of risk diversification with the aim of generating an appropriate increase in the value of the investment. It is intended to invest mainly in global convertible bonds and high yield bonds. The objective is to achieve a diversified portfolio. The investment scope ranges from high yield paper and subordinated bank bonds to equity sensitive convertible bonds. Portfolio construction, including a focus on equity sensitivity, credit risk, duration, regional and sector allocation, will be actively aligned with the current and expected future market environment. Accordingly, important factors influencing the performance of the assets of the UCITS will be the international equity and bond markets as well as the international currencies against the EUR. Convertible bonds are bonds that are generally convertible into equities or other equity securities at the option of the bondholder for a specified period of time on pre-determined terms. Convertible bonds offer the security of a bond with the option for potential capital gains. In principle, in addition to the conversion right, each convertible bond securitises the same claims as an ordinary bond.

The depositary of the fund is Liechtensteinische Landesbank AG. The Prospectus and the current annual and semi-annual reports, the current unit prices and further information on the Fund can be found free of charge in the legally-binding language according to the Prospectus at www.llb.li.

Intended retail investor: The fund is aimed at retail investors who pursue the objective of general asset accumulation / asset optimisation and have a medium-term investment horizon. This product is a fund for investors with no or little knowledge and / or experience in financial products. The investor can bear losses up to the complete loss of the capital invested and does not attach any importance to capital protection.

II. What are the risks and what could I get in return?

Summary Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the product manufacturer to pay you. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Other substantial risks: In addition, there are risks that are not included in the risk indicator. Comprehensive explanations can be found in the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product or a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 4 years Example Investment: EUR 10,000		If you exit after 1 year	If you exit after 4 years (Recommended holding period)
Minimum	You could lose some or all of your investment.		
Stress	What you might get back after costs	EUR 5,350	EUR 5,870
	Average return each year	-46.5 %	-12.5 %
Unfavourable	What you might get back after costs	EUR 8,130	EUR 8,290
	Average return each year	-18.7 %	-4.6 %

Favourable	What you might get back after costs	EUR 12,780	EUR 12,440
	Average return each year	27.8 %	5.6 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor / and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you could get back under extreme market conditions. The unfavourable scenario occurred when investing in the fund or the benchmark between Feb 2021 – Aug 2024. The moderate scenario occurred when investing in the fund or the benchmark between Aug 2018 – Aug 2022. The favourable scenario occurred when investing in the fund or the benchmark between Aug 2017 – Aug 2021.

III. What happens if LLB Fund Services AG is unable to pay out?

The default of LLB Fund Services AG has no direct impact on your payout, since the legal regulation stipulates that in the event of insolvency of LLB Fund Services AG, the special assets are not included in the insolvency estate, but remain independent.

IV. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return).
For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

	If you exit after 1 year	If you exit after 4 years
Total costs	EUR 470	EUR 1,013
Annual cost impact (*)	4.8 %	2.6 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.3 % before costs and 1.7 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you.

These figures include the maximum distribution fee that the person selling you the product may charge (3.0 % of amount invested / EUR 300). This person will inform you of the actual distribution fee.

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	3.0 % of the amount you pay in when entering this investment. This is the maximum amount that you can be charged.	EUR 300
Exit costs	0.0 % of your investment before it is paid out to you.	EUR 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.5 % of the value of your investment per year. This is an estimate based on actual costs over the last year.	EUR 150
Transaction costs	0.3 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	EUR 30
Incidental costs taken under specific conditions		
Performance fees	The actual amount depends on how well your investment performs. The above estimate of the cumulative cost includes the average of the last five years.	EUR 0

V. How long should I hold it and can I take my money out early?

Recommended holding period: 4 years

This product has no minimum holding period. It is suitable for medium-term investments. You should therefore be prepared to remain invested with your investment for at least 4 years. However, you can return your investment on any Liechtenstein banking day and without penalty.
